

Arthur Bosch,

Junior Web Developer.

Aurora, Ontario | dev@arthurbosch.com | www.arthurbosch.com | (437) - 545 - 1380

Summary:

- Highly motivated for professional growth through hard work and communication with more experienced colleagues
- Devoted to delivering the best user experience possible through responsiveness, visual attractiveness and simplicity for users
- Excellent communication and networking skills coming from previous employments in different fields
- Able to communicate fluently in three languages: English, Russian, Hebrew
- Capable to deliver required result in high-pressure environment
- Interest in the whole cycle of product development - UI/UX, front-end, and back-end
- Experienced with front-end design and development tools: Figma, React, Next, SCSS, Tailwind
- Familiar with back-end and database technologies: NodeJS (Express, Nest), MongoDB, PostgreSQL
- Skilled with Typescript, Git, GitHub

Projects:

1. Online Cinema

- Streaming services clone with authorization (JWT Tokens), Admin panel, search and statistics for every title
- Server-side rendered front-end is built using Next.js, Redux and styled components (PostCSS & Tailwind)
- Back-end is developed with Node.js framework Nest.js. MongoDB is used as a database
- Using this stack gave amazing results of page upload speed and overall responsiveness

2. Personal Portfolio Website

- My personal landing page showcasing my projects and UI/UX knowledge
- Built using Next.js and styles components (PostCSS & Tailwind)
- Exceptionally fast page upload
- Interface is adaptive for different screen sizes, making it look perfect on each and every device

3. Simple Timekeeper

- Utility tool for keeping track of your labor hours
- First designed for personal usage, then scaled for multiple users
- Progressive web application (can be used both in browser and as native app) built with React
- Back-end is built using Express.js (Node.js framework) and PostgreSQL as a database

Previous employments:

1. Military service (2020 - 2022)

- Aircraft electronics junior engineer in field
- Performing in a high-paced, high-pressure, and demanding environment
- Continuous cooperation and communication with other departments
- Required fast learning and perfect execution

2. Line Cook at Marriott's Sheraton (2022 - 2023)

- Cooperation with the best professionals in this field
- Demand for fast learning and perfect execution
- After four months, took the position of Deputy Leader for the Restaurant Department, which led to an increased number of responsibilities, such as staff management, service management and purchases

Education:

1. High School (Meir Shfeyah, Israel)

- Graduated with a GPA of 95 on the national high school exams
- Major in Electrical Engineering
- Certificate of excellence

2. Military aircraft electrical engineering course (5 months)

3. JavaScript and React Basics Course at webcademy.ru (3 months)

- Learned basics of web development
- Created 3 projects using vanilla JS, CSS and Webpack
- Created one project using React

4. Fullstack development intensive course at htmllessons.ru (2 weeks)

- Learned about fullstack development: advanced back-end technologies, such as Nest.js and MongoDB
